SIDE BRUSHES

o «Large diameter brushes»

Large diameter side brushes designed in 4 segments.

The assembly of large diameter brushes can be a problem for the users: weight, handling storage...

To solve these problems, SOVB has developed a simple and fast system enabling assembly by one person.

The system :

- A brush top, directly adjustable on the sweeper hydraulic motor plate
- A brush made of 4 segments in plastic, allowing quick assembly and fixing

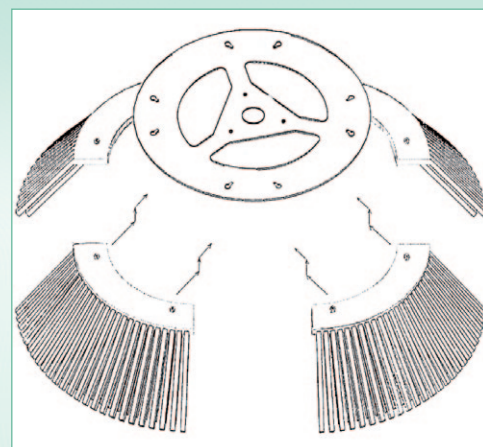

The benefits :

- Time saving
- Space saving (packaging in boxes)
- Ease and speed of assembly and disassembly (by one person)
- Lifetime greater than a wooden disk
- Brush fully recyclable

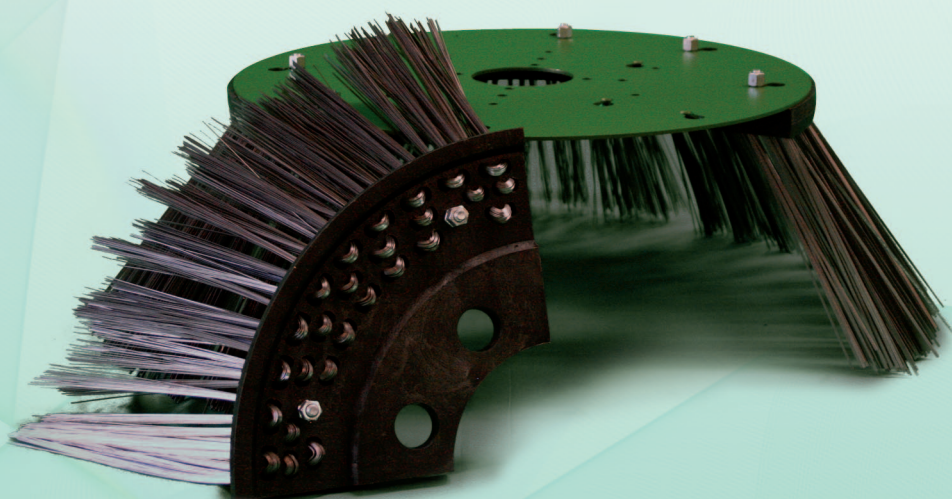

SPECIFICATIONS

- Segments in plastic
- Types of bristle depending on the end use of the broom : flat steel, rilsan (SP), polyester (PET), nylon (NY), polypropylene (PPL), LL'2BCA and all combinations of these materials

OUR BRUSHES ARE FULLY RECYCLABLE.

Adjustable brush top, allowing quick assembly for brushes in segments

INSTRUCTIONS FOR USE

WARNING :

- Avoid forcing the brush against the curb (possibility of damaging the brush tops and/or the bristles),
- Avoid adjusting the brush with excessive force (possibility to crush or distort the bristles, and therefore lose effectiveness),
- Ensure correct rotation direction (orientation), and rotation speed of the side brushes.

Any information provided and/or photos showing our products are not contractual: our products are updated and changed alongside any technological advances. Similarly, we may replace certain materials used to ensure we conform to market requirements.
