WEED REMOVAL SIDE BRUSHES

o for a hard sweep and no pesticides

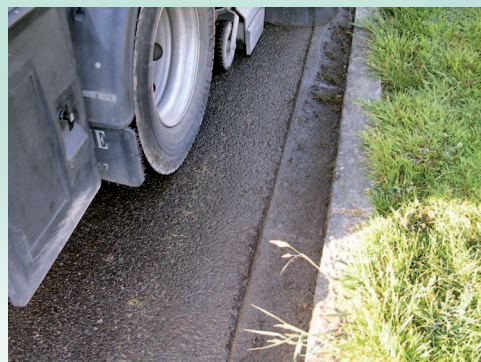

The weed brush removes the weeds growing in the gutter. It ensures a quick and efficient action.

SPECIFICATIONS

- Brush tops or supports in plastic
- Types of bristle :
 - CRIMPED STEEL + FLAT STEEL for a lighter weeding
 - HIGH TENSILE FLAT STEEL WIRE SOLID STRAND + FLAT STEEL WIRE for a harder weeding
 - HIGH TENSILE FLAT STEEL WIRE SOLID STRAND for the strongest and complete removal of weeds
- Diameter and length of the bristles adapted to all types of road sweepers.

INSTRUCTIONS FOR USE :

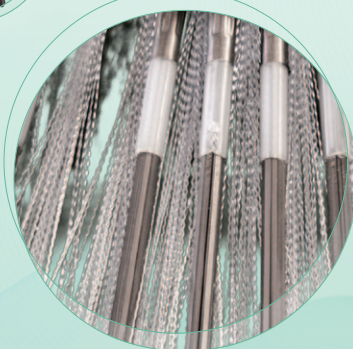

- Highest speed rotation of the brush
- Ground pressure : not more than the weight of the broom
- Angle depending on the surface of weed removal
- Water the surface well before use
- Drive the sweeper slowly
- For further information contact us

WARNING... *can only be used on road sweepers which are powerful enough to drive such a brush*

Filled with high tensile flat steel wire solid strand

Filled with high tensile flat steel wire solid strand + crimped steel

Filled with crimped steel + flat steel

WARNING :

- Avoid forcing the brush against the curb (possibility of damaging the brush tops and/or the bristles),
- Avoid adjusting the brush with excessive force (possibility to crush or distort the bristles, and therefore lose effectiveness),
- Do not use on uneven gutters
- Remember to water before use (risk of damaging the road)

OUR BRUSHES ARE FULLY RECYCLABLE.

Any information provided and/or photos showing our products are not contractual: our products are updated and changed alongside any technological advances. Similarly, we may replace certain materials used to ensure we conform to market requirements.
